

What went well?

What should we keep doing?  
What should we celebrate?  
Where did we make progress?

What went poorly?

Where did we have problems?  
What was frustrating to us or others?  
What held us back?

1.Ecosystem Restoration:  
Support efforts to restore and protect aquatic ecosystem, with can naturally filter and clean water.

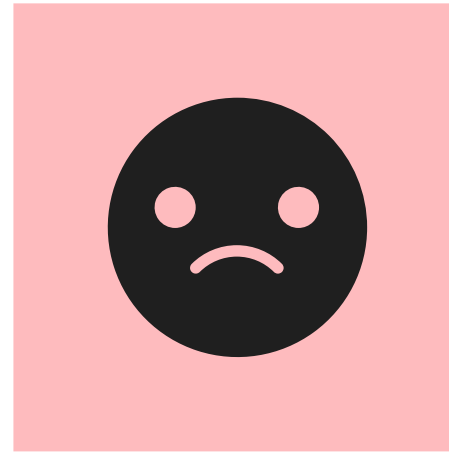

2.Innovative solution:  
celebrate the development and implementation of innovative technologies and practices that reduce water pollution.

3.Wastewater Treatment:  
Many countries have improved their wastewater treatment infrastructure, reducing the release of harmful substances into rivers and oceans.

1.Industrial pollution:  
Some industries still discharge pollutants into water bodies, especially in regions with lax regulations and enforcement.

2.Health concerns:  
People living in areas with pollution water sources often suffer from health issues, such as gastrointestinal problems and long-term health risks.

3.Weak Regulations:  
inadequate or poorly enforced environmental regulations can allow industries and individuals to continue polluting without consequences.

1.Corporate Responsibility:  
Collaborate with business to encourage sustainable production methods and responsible waste disposal.

2.Water Recycling:  
Encourage water recycling and reuse systems in industries and municipalities to reduce the demand on freshwater resources and minimize pollutant discharge.

3.Natural solution:  
Further exploring and scaling up natural solutions like natural can help drive positive changes in human behavior related to water use and pollution prevention.

1.Strengthen Regulation:  
Enforce and enhance environmental regulations to limit pollutant discharges into water bodies and ensure strict compliance.

2.Public Awareness:  
Raise awareness among consumers about the environmental impact of their food choices, encouraging support for sustainable agriculture.

3.Public Advocacy:  
Advocate for strong and lasting environmental policies at local, national, and international levels to ensure ongoing pollution control and prevention.

What ideas do you have?

What ideas do you have for future work together?  
Where do you see opportunities to improve?  
What has untapped potential?

How should we take action?

What do you believe we should do next?  
What specific things should we change?  
What should extend beyond this meeting?
